I am an enthusiastic Full Stack Developer with a toolkit brimming with technologies like HTML, CSS, JavaScript, React, and Node.js. I thrive on transforming ideas into beautiful, functional web applications. With a firm grasp of Git and GitHub for keeping my projects tidy. I'm always ready to tackle new challenges with a smile. Beyond coding, I'm passionate about making a positive impact through volunteer work and capturing the world's beauty through my lens. Eager to bring energy, creativity, and dedication to your next project!

## SKILLS

- HTML
- CSS
- Java Script
- React
- Redux
- SQL
- Express.js
- Node.js
- Auth
- Git
- Github
- Responsive design
- Problem resolving
- Debugging

## WORK HISTORY

### FULL STACK ENGENEER BOOTCAMP

TECHNATIVE DIGITAL                    MAR 2024 - CURRENT

- Studies based on the Full Stack Engineer path on Codecademy, gaining comprehensive knowledge and handson experience in both front-end and back-end web development
- Acquired proficiency in HTML, CSS, JavaScript, React.js, Node.js, among other technologies
- Demonstrated problem-solving skills by tackling real-world coding challenges and debugging complex issues within web applications
- Collaborated with peers in a virtual environment, participated in code reviews, and provided constructive feedback to foster a collaborative learning environment
- Utilized Git and GitHub extensively for version control, maintaining a clean and organized repository with clear commit messages and documentation
- Implemented React.js and Redux to build dynamic and responsive user interfaces, effectively managing application state and data flow within complex web applications
- Familiarized with best practices in web accessibility.
- Backend using SQL, Express.js and Node.js
- **Projects:**
- - Dream Generator: https://technative-academy.github.io/Dream-Generator/
- - Airbnb: https://airbnb-web.netlify.app/
- - AI Cooking Assistant: https://team-wolf.netlify.app/
- - Random Users API: https://test-random-users.netlify.app/
